Subject: PFAS Remediation Technology

Hi Alexandra,

My name is Jarrett Gray, and copied here are my colleagues Nikolas Franceschi-Hofmann and Elizabeth Perry.

We believe we have found a remediation technique that **completely** breaks down PFAS molecules into **non-toxic bi-products**. We believe our technology can be easily implemented in water treatment facilities.

We are currently working on starting a business entity and patenting our technology. That being said, we have been researching government interest and I came across your name in the June 25th, PFAS Community Engagement powerpoint on the EPA website. Would we be able to schedule a meeting to talk about the PFAS problem and where our technology might fit in?

Thank you for your time,

Jarrett
